

1. The first group of respondents (10%) was asked to provide information on their demographic characteristics, including age, gender, education level, and occupation. This information was used to ensure that the sample was representative of the target population.

2. The second group of respondents (20%) was asked to provide information on their knowledge of the research topic. This information was used to ensure that the sample was representative of the target population.

3. The third group of respondents (30%) was asked to provide information on their attitudes towards the research topic. This information was used to ensure that the sample was representative of the target population.

4. The fourth group of respondents (40%) was asked to provide information on their behaviors related to the research topic. This information was used to ensure that the sample was representative of the target population.

5. The fifth group of respondents (50%) was asked to provide information on their intentions related to the research topic. This information was used to ensure that the sample was representative of the target population.

6. The sixth group of respondents (60%) was asked to provide information on their beliefs related to the research topic. This information was used to ensure that the sample was representative of the target population.

7. The seventh group of respondents (70%) was asked to provide information on their values related to the research topic. This information was used to ensure that the sample was representative of the target population.

8. The eighth group of respondents (80%) was asked to provide information on their emotions related to the research topic. This information was used to ensure that the sample was representative of the target population.

9. The ninth group of respondents (90%) was asked to provide information on their personality traits related to the research topic. This information was used to ensure that the sample was representative of the target population.

10. The tenth group of respondents (100%) was asked to provide information on their overall satisfaction with the research topic. This information was used to ensure that the sample was representative of the target population.
